Hard-working, motivated individual. Well versed in various computer languages focusing web development with a background in empirical research studies from design to analyzing data. Possesses a Bachelor of Science, impeccable written and verbal communication skills, and excellent interpersonal skills.

PROFESSIONAL EXPERIENCE

DZ Designs - Atlanta, GA

Designer and Developer - Jan 2019 - Present

Design and develop sites for businesses, individuals, and artists using HTML5, CSS3, JavaScript, and Bootstrap. I use design tools like Figma for wireframing and Git/GitHub for version control and backups. Additionally, I conduct client meetings to determine client needs for development and budget as well as assisting in hosting and domain acquisition. I also create sites with custom or starter WordPress themes and building static pages within the WordPress stack using HTML5, SASS, JavaScript, and PHP.

RLM - Gainesville, GA

Web Developer - Jan 2017 - Present

Design, create, and maintain sites using custom WordPress themes. Building static pages with HTML5, SASS, JavaScript, and utilizing PHP and other backend WordPress and WooCommerce hooks to create custom payment gateways and shipping. I also use jQuery and AJAX. Specifically, for rendering the minicart with cart data dynamically. I utilize the Bootstrap library and gulp.js to process SASS and bundle the site for production. Create SEO friendly sites by using proper HTML5 semantic components, accessibility standards, and proper meta tags. Taking advantage of Google business accounts and creating successful and meaningful advertisements with real returns.

EDUCATION

University of North Georgia - Dalton, GA
